Team Members

Luke Flaker

Mia Gallo

Annaliese Dedmore

Introduction

This document explains how our team plans to work together throughout the project. It covers each team member's role and responsibilities and explains how we will run meetings, communicate, and make decisions. It also covers the tools we will use and how we plan to keep our work organized. These standards will help our team stay coordinated and handle any issues that come up throughout the project.

Team Members and Roles

LUKE FLAKER

Team Leader

Responsible for leading team meetings, helping assign tasks when needed, and keeping track of the team's overall progress. Also responsible for leading project presentations and submitting team assignments on Canvas.

Customer Communicator

Responsible for communicating with the project sponsors and keeping them updated on the team's progress. Also responsible for coordinating sponsor meetings and making sure any questions or concerns are communicated.

Full-Stack Programmer

Responsible for working on both the front end and the back end of the program. Helps connect the program's interface with its functionality. Assists with back-end and front-end tasks when needed.

ANNALIESE DEDMORE

Recorder

Responsible for taking notes during team meetings and keeping track of important discussions and decisions. Also responsible for maintaining meeting minutes.

Release Manager

Responsible for managing the team's GitHub repository and keeping the code organized. Also responsible for managing branches, reviewing commits, and making sure the working version of the project is maintained.

Back-End Programmer

Responsible for developing the program logic and functionality that runs behind the interface and supports the main features of the program.

MIA GALLO

Editor

Responsible for reviewing team documents before they are submitted and making sure the writing and formatting are consistent. Also responsible for checking that all of the required information is included in assignments and letting the team leader know when they are ready to submit.

Architect

Responsible for overseeing the overall structure and design of the project. Ensures major design decisions are followed and that different parts of the project work together properly.

Front-End Programmer

Responsible for developing the parts of the program that users see and interact with, including the interface and overall usability.

Team Meeting Expectations:

TEAM MEETINGS

Tuesdays
2:30 PM - 3:30 PM
Discord

MENTOR MEETING

Thursdays
2:30 PM - 3:30 PM
Engineering Building, Room 235

SPONSOR MEETINGS

Monthly
Based on sponsor availability
Reserved Library Room

IMPROMPTU MEETINGS

As needed
Discord
Preferably with at least 3 days' notice

AGENDA STRUCTURE

Meetings will begin with a quick review of what needs to be covered. Each team member will then have a chance to update the group on what they have completed since the last meeting and raise any concerns that need to be discussed. The team will then move on to any group work or decisions that need to be made. During the last week of each month, time at the end of the meeting will also be set aside for self-review.

MINUTES

The Recorder will take meeting minutes during each team meeting using a pre-formatted document. The minutes will include attendance, important topics discussed, and decisions made. The document will be organized by date and shared in the shared Google Drive so everyone can review it as needed.

DECISION MAKING PROCESS

We will discuss major decisions during team meetings. If a decision needs to be made quickly, we can discuss it through Discord instead. Everyone will have a chance to share their opinion. The team will try to find a compromise when possible; if not, a two-thirds majority will make the final decision.

ATTENDANCE

Attendance will be recorded in the meeting minutes. If a team member will be late or cannot attend, they should let the team know as soon as possible. Missing a meeting for an emergency or another reasonable excuse will not be held against the team member. When needed, the team will reschedule the meeting, preferably before the next mentor meeting. Missing a meeting without letting the team know will be documented in the minutes. If

	this happens more than three times, the team may bring the issue to the Capstone Coordinator.
CONDUCT	Team members are expected to be respectful to one another. Everyone will have a chance to share their ideas or concerns without being interrupted or dismissed. If an issue comes up between team members, they should discuss it first. If the issue continues, they will bring it up during the next team meeting and record it in the minutes. If the team still cannot resolve the problem, they may bring the issue to the Capstone Coordinator.

Tools and Document Standards

VERSION CONTROL		
<i>GitHub + Discord</i> The team will use GitHub to store and manage the project's code. Team members will work on separate branches when making changes. Each commit should include a short message about the changes. Before merging a branch into the main branch, the team should check the code and make sure it works properly. The <i>#github-updates</i> channel on Discord will let the team know when changes have been made and provide more details when needed. The Release Manager will help keep the repository and branches organized.		
ISSUE TRACKING <i>Discord + Team Tracker Spreadsheet</i> The team will use a <i>#new-tasks-and-issues</i> channel on Discord to track new tasks, bugs, and other issues. Team members can also post when they fix an issue. The team will discuss new tasks and issues at the next meeting and add them to the Team Tracker Spreadsheet. If something needs to be handled before the next meeting, the team will use Discord to decide who is available to handle it.	WORD PROCESSING AND PRESENTATION <i>Capstone Google Drive Folder</i> The Capstone Google Drive folder will hold all shared team documents and presentations so everyone can access and work on them as needed.	COMPOSITION AND REVIEW Each team member should have their part of the assignment finished at least 24 hours before it is due. The Editor will then combine the sections, review the writing and formatting, and make sure everything required is included. Once the final document is ready, the Editor will let the Team Leader know that it is ready to submit.

Introduction Team Self Review

At the end of the team meeting in the last week of every month, the team will do a short self-review. Each team member will give a quick summary of what they worked on that month and anything they feel they could improve on. This will also be a time to raise any problems with the team's workflow or anything the team could do better. Team members can also give each other constructive feedback when needed.
